

## **Traveling Within the Building**

### **Introduction**

Movement about the building is essential and cannot be eliminated. GSC has devised a plan to allow for travel throughout the building while keeping the students and staff safe.

### **Philosophy**

Students need to travel from the bus, to their classroom, to the lavatory and other essential areas. This plan has been developed keeping in mind the strategic use of masks, social distancing and maintaining cohorts.

### **Process**

1. Everyone will wear masks while traveling within the school.
2. Directionality signs and arrows will be posted.
  - GSC will divide the hallway in two.
  - Everyone will keep right while traveling the hallways.
  - Only 1 class at a time will be permitted in the hallway.
3. A schedule will be developed that take into consideration the movement of cohorts around the building. Traveling will be limited.
4. Recess and dismissal travel will be organized according to cohorts.
5. All commonly touched items, like railings, doorknobs will be cleaned throughout the day.
6. Doors will be open during the change. In grades 6 through 8 the teachers will switch classes not the students.
